Science

Aims

A vibrant blue and yellow macaw parrot is perched on a wooden branch. Its wings are spread wide, showing the intricate patterns of its feathers. The parrot has a bright blue head and neck, a yellow body, and a reddish-brown chest. The background is dark with some blurred light spots.

Science nurtures pupils' natural curiosity and helps develop inquiring minds.

Sustainable science teaches pupils about the important interaction between human activity and the environment and how we can make a positive impact.

Practical experiments and investigations in science teach pupils the importance of accuracy and problem solving.

Science develops in pupils an attitude of respect for themselves, others and the world around them.

Science helps pupils develop the skills to think, critically, solve problems and make decisions.
