

Art

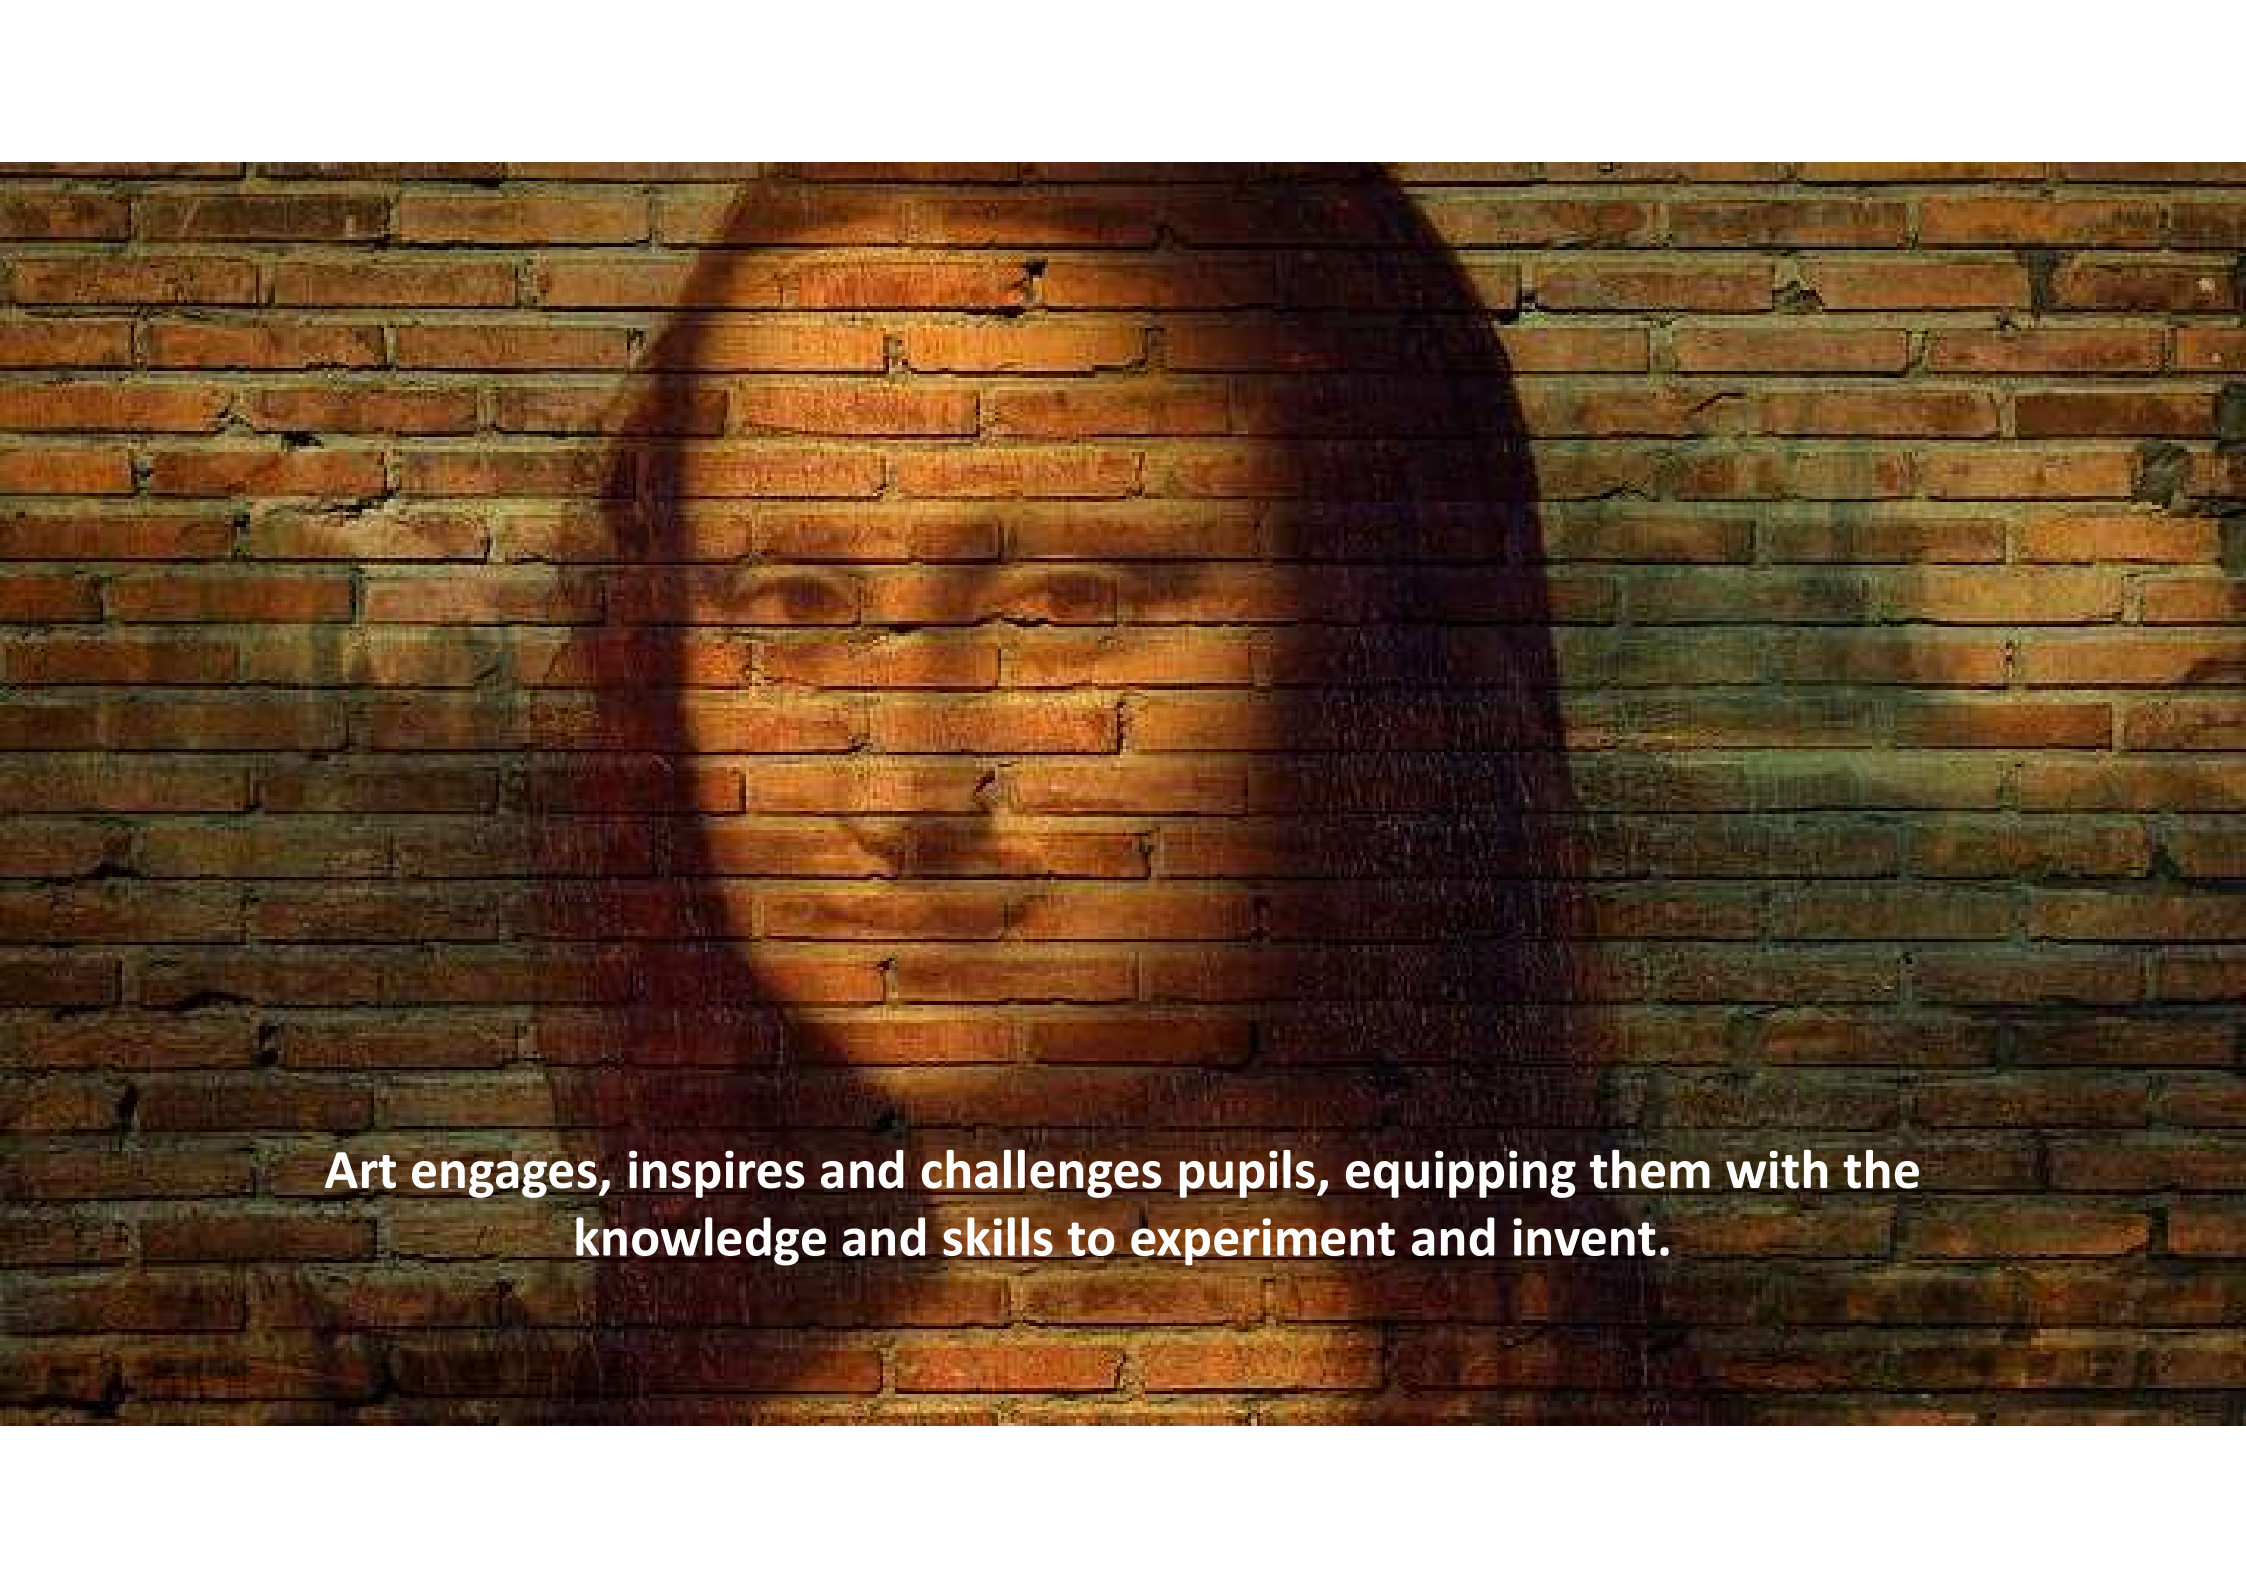

Art

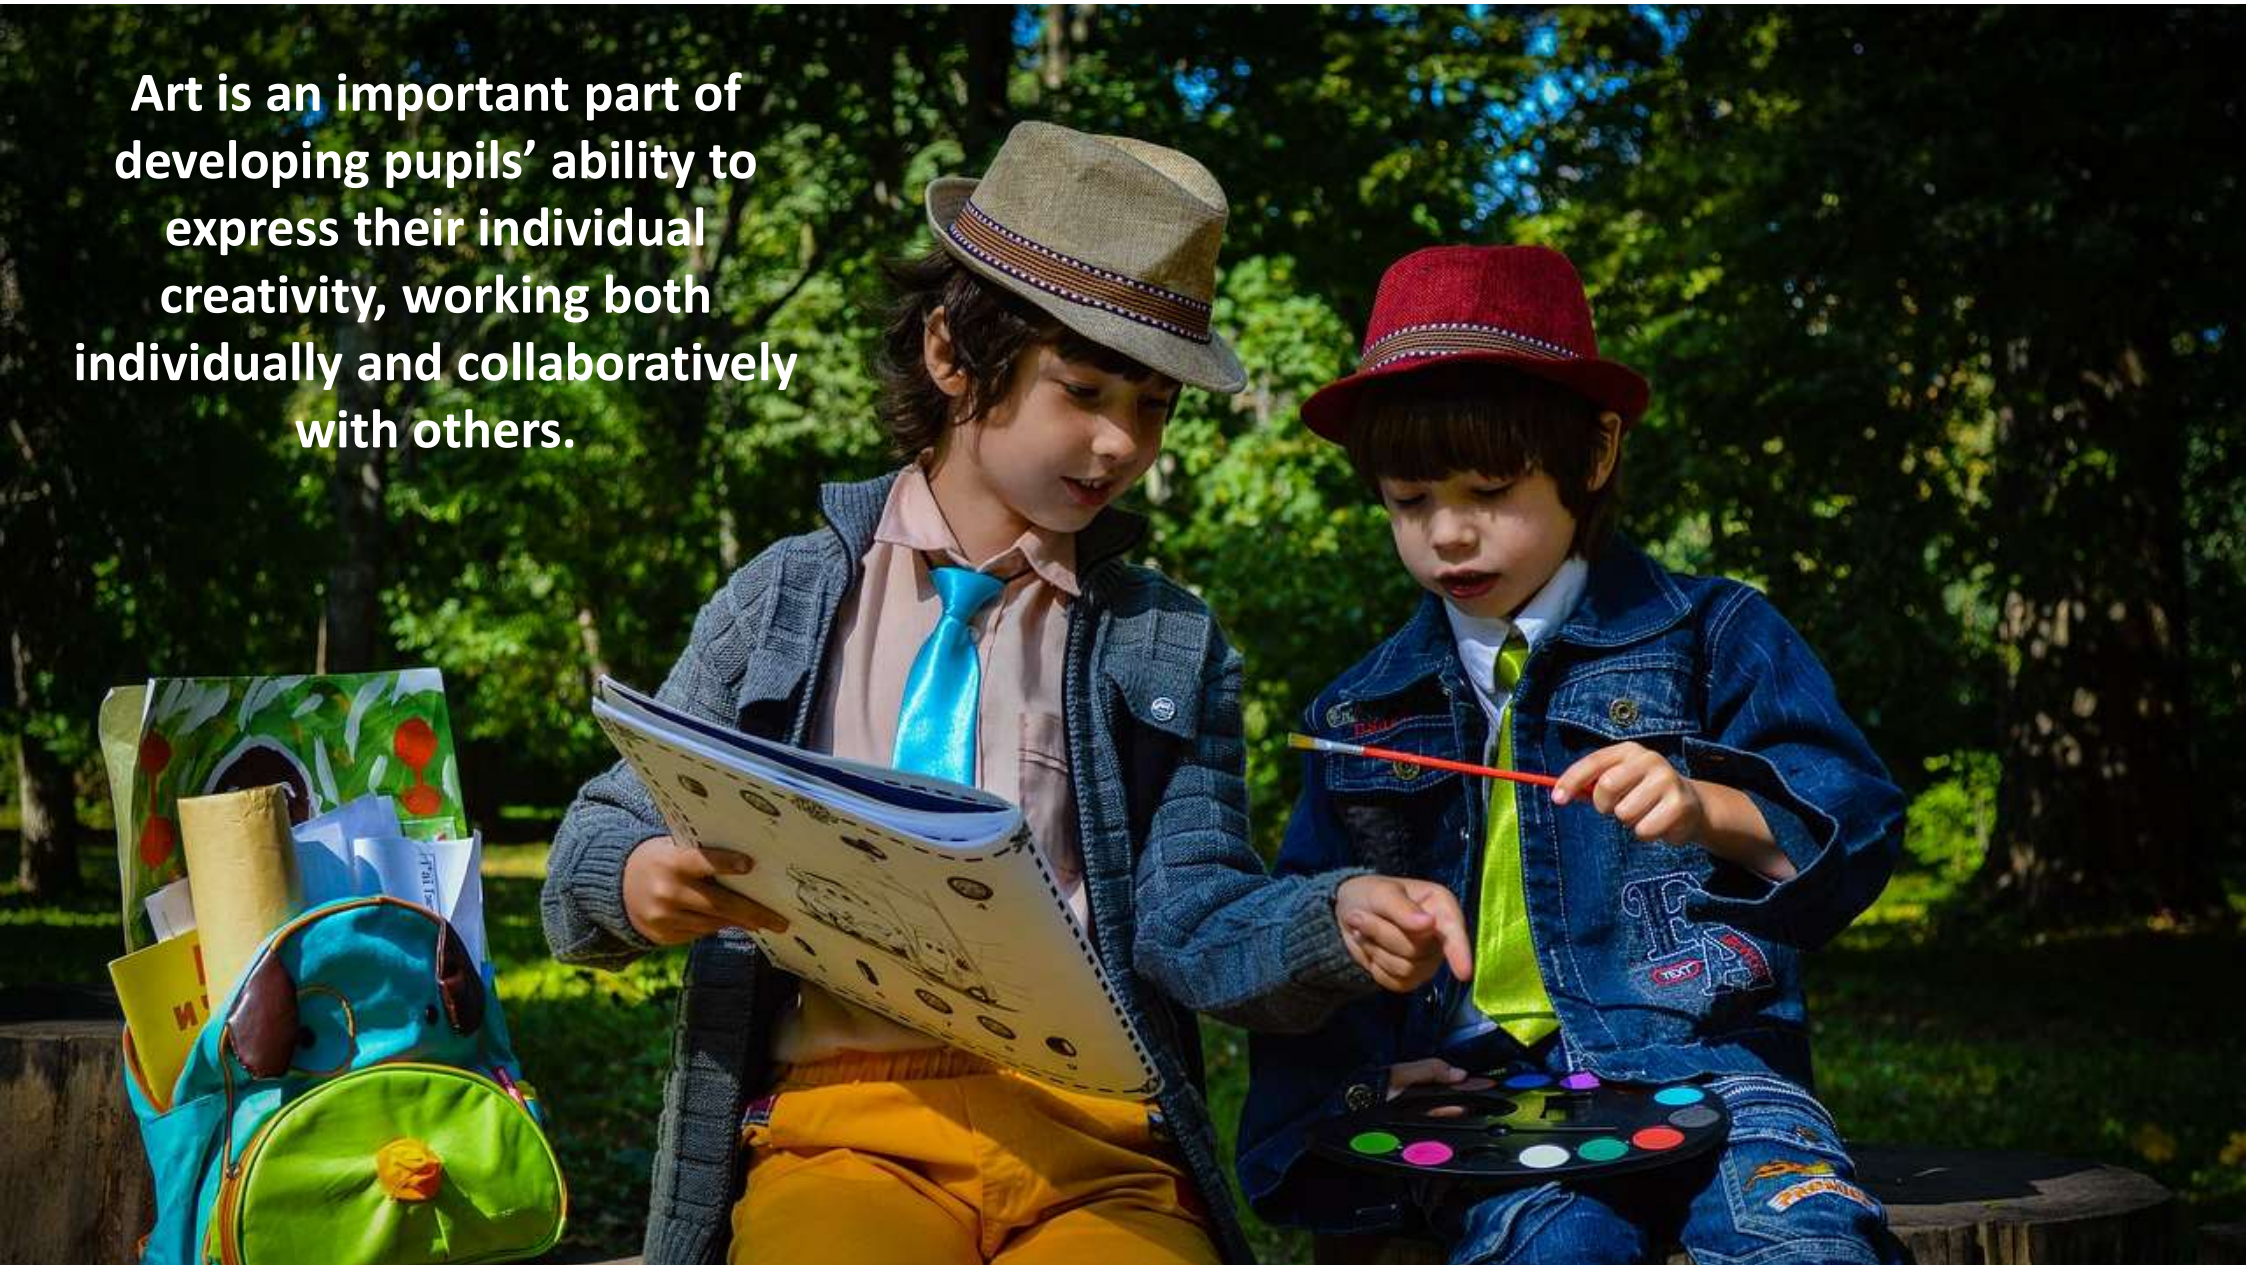

Aims

A photograph of a brick wall with a large, dark shadow cast onto it. The shadow is the silhouette of a person's head and shoulders, facing forward. The bricks are reddish-brown and arranged in a standard pattern. The lighting is dramatic, with the shadow being very dark and the wall being illuminated from the side.

Art engages, inspires and challenges pupils, equipping them with the knowledge and skills to experiment and invent.

Art is an important part of developing pupils' ability to express their individual creativity, working both individually and collaboratively with others.

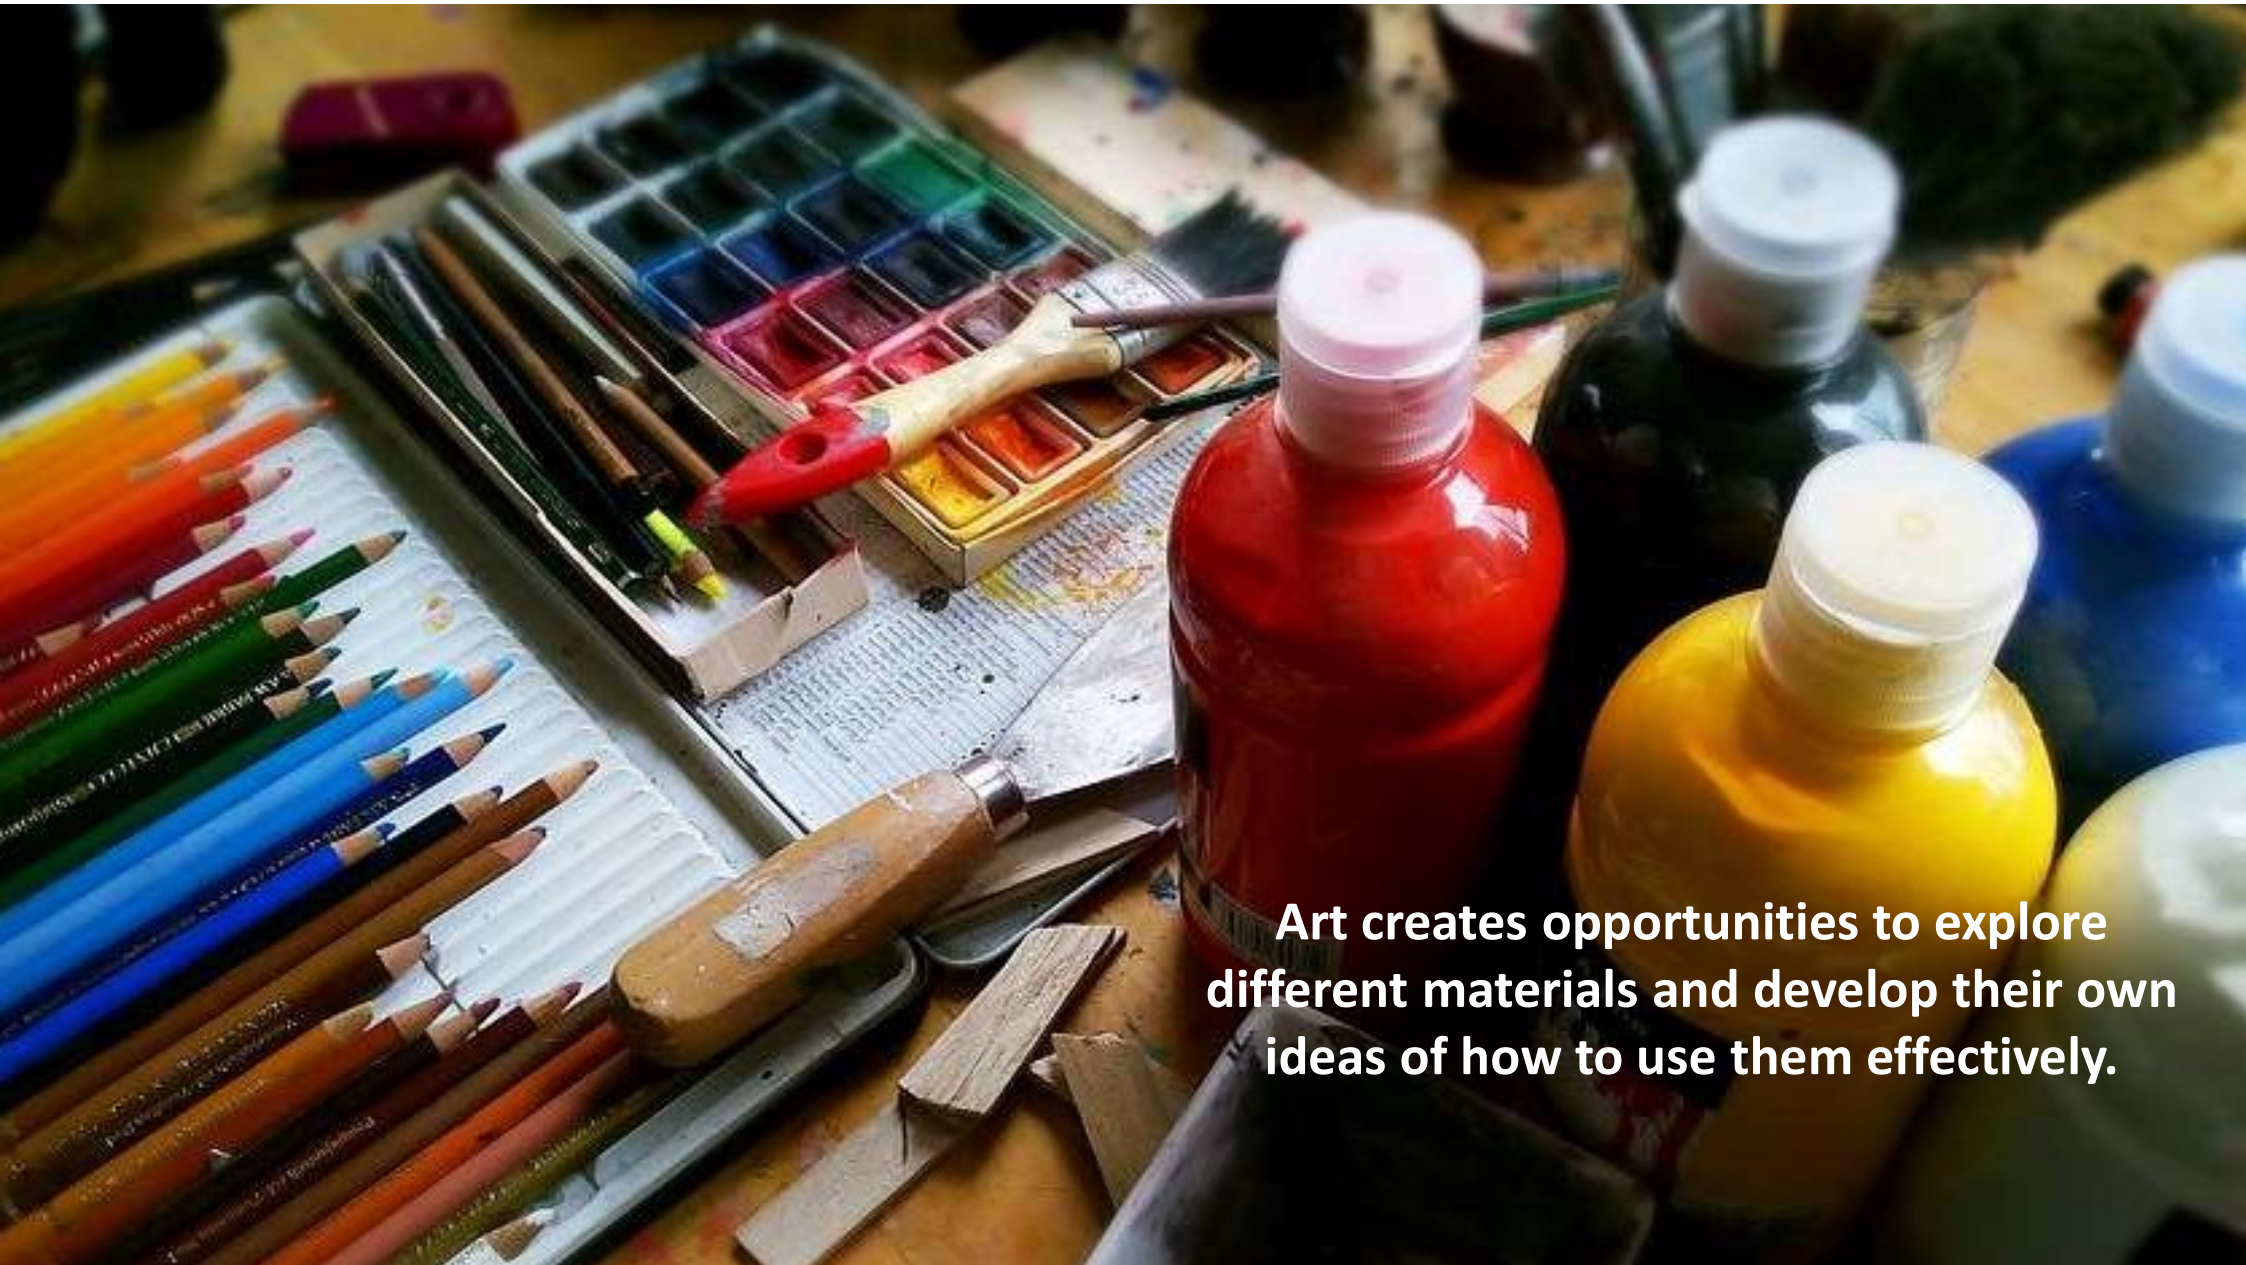

Art takes pupils to other worlds, cultures and times, as they explore ideas in the work of a variety of artists.

Through art, pupils produce their own, original creative work, exploring their ideas and recording their experiences.

Art creates opportunities to explore different materials and develop their own ideas of how to use them effectively.
