Aims

Through Computing, pupils are more able to actively participate in a rapidly changing technological world.

Computing helps pupils to express themselves and develop their ideas through information and communication technology. At a level suitable for the future workplace and as active participants in a digital world.

Computing teaches pupils how to stay safe online, and where to go for help and support.

Computing develops pupils' skills in using technology to create, organise, store, manipulate and retrieve digital content.

Computing nurtures pupils' collaboration skills, as they work together and support one another in their learning.
